EDUCATION

SR University Bachelor of Technology in Computer Science and Engineering	2023-2027 Warangal, Telangana
• CGPA: 8.4/10	

INTERNSHIPS

Altair Data Science Intern	Hyderabad, India Jan-Mar 2026
• Completed a 10-week internship focused on data science, machine learning, and data engineering , working on data preprocessing, feature engineering, and workflow automation using 5+ datasets .	
• Validated proficiency in classification, regression, and clustering techniques by implementing and evaluating machine learning models, achieving successful results across multiple assessment tasks and project evaluations.	
AICTE Eduskills AI/ML Intern	Kolkata, India Oct-Dec 2024
• Devised testing strategies for 6+ machine learning models across 3 datasets , identifying and resolving 10+ data inconsistencies that improved overall model precision by 12% .	
• Evaluated and optimized multiple AI/ML models using comparative analysis and performance tuning techniques, enhancing prediction reliability and model efficiency across diverse datasets.	

SKILLS

Languages:	Python, Java, JavaScript, TypeScript, SQL
Databases & Cloud:	PostgreSQL, MySQL, MongoDB, AWS
Tools & Frameworks:	React.js, Next.js, Pygame, OpenCV, MediaPipe, Flask, Git, GitHub
Platforms:	VS Code, Jupyter Notebook, Figma, IntelliJ IDEA
Specialized Skills:	Data Science, Machine Learning, Full Stack Developer
Coursework:	Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

PROJECTS

Retinal Classification Python PyTorch Scikit-learn Kaggle(GPU-T4) Timm OpenCV Link	Jan 2026
• Built a retinal disease classification pipeline using PyTorch and pretrained CNN models (ResNet/EfficientNet) for 8-class fundus image classification on 6K images , improving validation accuracy from 45% to 55% (+10%) .	
• Improved model robustness and minority class prediction performance through targeted data augmentation, weighted training, and confusion matrix-driven error analysis , enhancing fairness and classification reliability.	
Symptom Cure React.js Flask Node.js MongoDB Link	Mar 2025
• Designed and deployed a symptom-analysis platform using 250+ herbal remedies and 150+ symptom-condition mappings , achieving 87% recommendation accuracy through optimized rule-based logic.	
• Integrated a multi-layer decision engine with severity scoring, dosage standardization, and risk profiling for children, elderly, and pregnancy, improving consistency across 500+ test scenarios .	
Food Rescue React.js Flask PostgreSQL SQLAlchemy Bootstrap Link	Sep 2025
• Created a full-stack food donation platform enabling restaurants to contribute surplus food and NGOs to claim available donations through a responsive and user-friendly React.js interface.	
• Architected a scalable REST API backend with Flask, SQLAlchemy, and PostgreSQL , featuring optimized relational database schemas, secure API communication, and automated food expiry tracking.	

ACCOMPLISHMENTS

• Achieved 6th position among 100+ projects at Project Expo 2025 Yantra'25 at SR University, Warangal , and received the Best Project Award for “VigilantEdge Patrol System.”	
• Secured 7th place in the National Hackathon at SRM University AP , ranking in the top 4% among 250+ competing teams by developing an innovative technology-driven solution under competitive conditions.	

CERTIFICATIONS

• AWS Academy Graduate: Cloud Foundations → Link	Oct 2025
• Cisco Networking: Introduction to Networks → Link	Dec 2024
• Endpoint Security – Cisco Networking Academy → Link	Dec 2024
